

Press Release..... 20/12/2021_

NATIONAL CONCERN DRIVERS ASSOCIATION OF GHANA

WE WILL DANCE TO THE TUNE OF THE GOVERNMENT IN A GRAND STYLE*

We have noticed keenly that all effort for the government to reduce fuel prices and taxes are unheeded.

If Ghanaians will recall, We protested against the high prices of fuel and scraping off some petroleum taxes, but the government have turned a deaf ears to all our plea and grievances.

As an Association, We are by this press promising the government that, the next line of action by us won't be favourable at all.

We are giving the Government one week ultimatum to reduce taxes on fuel or dance to the tune we will play .

We already stated in our previous statements that, the Price Stabilization, Recovery Levy, Energy Debt

Recovery Levy, Fuel Marking Margin, and Special Petroleum Tax are the sole cause of the price build up and must be scrapped to let fuel prices come down.

We are disappointed at government's refusal to meet their demands when it had the opportunity to do so in the 2022 Budget Statement and Economic Policy.

Again, We have given them a week ultimatum or face our wrath, our members are dying some are also running away from their bankers and debtors.

We ask all our customers and stakeholders to bare with us when the time is due.

Thank You.

Long live Ghana

Long live Drivers

Signed..
